

ELECTRICAL FIELD EVALUATIONS

As an OSHA Nationally Recognized Testing Lab (NRTL) since 1998, NSF International tests and certifies electrical products for the commercial food equipment, recreational water products, drinking water and waste water treatment and distribution.

The National Electrical Code (NEC) specifies in Article 90.7 that all electrical equipment must be approved. OSHA states in 29 CFR 1910.310 and the NEC states in Article 110.3 that all equipment in the workplace must be listed and labeled by a Nationally Recognized Testing Lab prior to operation of the equipment.

BENEFITS OF NSF'S ELECTRICAL FIELD EVALUATIONS

- > We provide quicker turnaround times than any other NRTL. In some cases, NSF can be on-site within the next business day.
- > We have vast expertise in testing and certifying laboratory and production equipment, water products, commercial food equipment and many more.
- > Field evaluations provide confidence that your product will meet the requirements of the local authority having jurisdiction (AHJ) inspector for final approval.
- > Our label is recognized by all AHJs in the United States.
- > The NSF mark is recognized by more consumers than many other NRTLs' marks.
