

IATF 16949 AUTOMOTIVE QUALITY MANAGEMENT SYSTEM

The IATF 16949 standard, in conjunction with ISO 9001 and any applicable customer specific requirements (CSRs), defines the quality system for the design and development, manufacturing, installation and servicing of automotive-related products. IATF 16949 certification is an industry requirement developed by the International Automotive Task Force (IATF) to align automotive quality systems throughout the world.

POTENTIAL BENEFITS

As a mandatory qualification for supplying major automotive manufacturers, IATF 16949 is embraced as the quality management system standard for the automotive industry. This standard provides benefits beyond quality and supply chain improvements, including:

- > A qualification to supply major automotive manufacturers
- > A way to demonstrate your organization's commitment to continuous improvement
- > Greater cost-effectiveness
- > Improved product, process and service quality
- > Easy integration into existing quality managements systems

An audit is an opportunity for improvement. The auditor is professional with high skills, good time management, and can point out nonconformances which provide us the opportunity to improve our quality management system, which we benefit from.

-MTD Metro Tool & Die Limited

The service with NSF-ISR has always been great and the auditor we have had is very knowledgeable with the IATF standard and very professional overall.

- Mercer Forge

I have worked with various auditors in the past and am very pleased with the audit process and usefulness of my audit reports for further improvements.

IATF 16949 AUTOMOTIVE QUALITY MANAGEMENT SYSTEM

WHY CHOOSE NSF-ISR?

The NSF-ISR process approach seeks to leverage your quality management system to align business goals and outcomes with client expectations and satisfaction for optimum performance.

- > Consistent high satisfaction levels across clients
- > Creative, value-added audit solutions to help your organization meet its certification objectives
- > Single point of contact for easy communication and scheduling across NSF-ISR standards
- > Member of national and international committees contributing to the standard development
- > Lead auditors on average have over 10 years of direct automotive experience, bringing you relevant and deep industry knowledge
- > Highly qualified to assist with transfer of existing certifications
- > Regular quality management system-focused webinars and additional resources available on demand
- > Largest number of IATF 16949 certificates of any certification body

The NSF team I have worked with is very professional. The audits we have completed have been value added and a good experience for the teams involved.

- Windsor Machine & Stamping Ltd.
