

ISO 21469 CERTIFICATION

BE MORE THAN COMPETITIVE. BE CERTIFIED.

AN EXTRA SAFEGUARD

H1 covers formulation. ISO 21469 also verifies safety measures at:

- 🔥 Manufacturing points
- 🔥 Distribution areas
- 🔥 Storage sites

Certified lubricants also comply with pharmaceutical, cosmetics and animal feed industry regulations.

ALREADY H1 REGISTERED?

You're partly there to certification.

Address not only chemical safety with an H1 registration, mitigate physical and biological risks too by certifying.

Work with NSF International to get certified to ISO 21469, *Safety of Machinery, Lubricants with Incidental Product Contact-Hygiene Requirements.*

THE GLOBAL STANDARD

NSF certification confirms compliance to hygienic requirements used worldwide.

Food processors around the world know and trust our certification mark.

Pressure from regulators and competitors are raising safety expectations for food grade lubricants.
