

SUSTAINABILITY CONSULTING

SUSTAINABILITY CONSULTING FROM NSF

Wherever you are on your sustainability journey, our services are uniquely structured to assist you in measuring and improving your social and environmental impacts. We **diagnose** key risks and opportunities, **design** tailored and feasible solutions, and **deliver** results to build resiliency, operational efficiency and brand reputation.

Whether you are looking for consulting services across your organization, or specific to a product, a facility or supply chain, we can help. Our breadth of expertise and diverse capabilities enable us to effectively engage with a broad range of industries, and serve as a resource for your sustainability and corporate social responsibility priorities at any stage in your process toward a more sustainable business model

DIAGNOSE

A critical step toward more sustainable operations and procurement is to identify, understand and diagnose your current state.

- **Benchmarking** Industry, Competitors and/or Standards
- **Materiality Assessment**
- **(FIRST)** Fully Integrated Risk Scanning Tool
- **Impact Assessment** of Products, Facilities and/or Supply Chains (LCA, GHG, Other)
- Identification of **Mitigation and Cost Saving Opportunities** in Operations or Supply Chain

DESIGN

With an understanding of your sustainability impact and position, we can help you chart a course for continuous improvement on sustainability.

- **Sustainability Strategy Development**
- **Implementation Plans** for Sustainability Goals and Opportunities (material, water, energy, carbon)
- **Policy** Development
- **Supplier Assessment and Verification** Design

DELIVER

NSF is a tactical partner for companies to deliver their sustainability and responsible sourcing goals.

- Project Management
- Supplier Engagement and Training
- Data Process Management
- Authentication and Verification
- Sustainability Reporting (CDP, GRI, SDG's, TCFD, among others)

WHY PARTNER WITH NSF?

We are a strategic partner for global clients dedicated to promoting brand responsibility, improving operational efficiency and managing environmental and social risks.

We diagnose impacts using scientifically-based methodologies and innovative software platforms, design strategies and action plans that are both feasible and impactful, and deliver results by helping implement solutions that meet corporate objectives and align with key stakeholder priorities.

Our highly passionate and qualified team of global professionals provides thought leadership and quality deliverables, furthering NSF's broader mission of protecting and improving public health and safety worldwide.
